Subject: Advice on first HT

Hello, I'm currently taking the Tech Nocode instruction courses. I'm  
looking for my first radio, and I've decided it'll probably be a HT Dual  
band, 2M/440. There are several out on the market. Can anyone steer me  
to or away from one of them. They all seem to be pretty well filled out, but  
practical experience will tell you a lot more than the advertisements.

Thanks in advance

Lee Reynolds

Subject: FOR SALE: 2-meter Multimode (REPOST)

FOR SALE: Yaesu FT-290R Mk II 2-meter SSB/CW/FM multimode, 25 w. output, 10 memories, 2 VFOs, scan. Absolutely mint, new condition, one month old. \$500.00 OBO and I'll pay shipping. Very nice compact radio, but I prefer a HF rig & transverter setup.

Please see my re-post; it should have been "\$500.00 OBO." If you don't like the price, Rusty, make me an offer; I'm flexible.

Subject: HTX-202 powersave mode strangeness?

I experience the exact same behavior and have also noticed that it is not exhibited by the 404. I tried a new 202 in a local RS store and was unable to duplicate the behavior on that one. Didn't spend a lot of time at it though... RS salesman (for what its worth) says "it shouldn't do that, send it in for service..."

Actually, it was Tracy who posted the original question, and I suggested the  
need for a connection in the earphone socket. You got your quote attributions  
backwards.

Cheers,

Tom
